

REASONS TO CONSIDER

**High Income Potential**

UYLD seeks to generate income through covered call writing, which historically produces higher yields in periods of volatility.

(note: past performance is not a reliable indicator of future performance)

**Efficient Options Execution**

UYLD writes call options on the S&P 500 Index, saving investors the time and potential expense of doing so individually.

**Potential Downside Mitigation**

The premiums UYLD generates may partly cushion drawdowns.

Income — Covered Call

As of 31 July 2025

KEY INFORMATION

Exchange Code	UYLD
IRESS	UYLD.AXW
ISIN	AU0000251860
Issuer	Global X Management (AUS) Limited

INDEX DESCRIPTION

The Cboe S&P 500 BuyWrite Index (the “BXMSM” or the “BXM Index”) measures the total rate of return of a hypothetical “covered call” strategy applied to the S&P 500 Composite Price Index (the “S&P 500® Index”). The “long” S&P 500 Index component and the “short” Covered Call Option component are held in equal notional amounts.

S&P 500 Index Component:

- Comprised of the constituents of the S&P 500 Index, which measures the total return of 500 leading companies listed in the US.
- Follows the weighting scheme that governs the S&P 500 Index.
- Reconstituted annually on the third Friday of September, as per the S&P 500 Index annual rebalance schedule.
- Reviewed for qualified new issue of common equities quarterly on the third Friday of March, June, September, and December as per the S&P 500 Index schedule.

“Covered Call” Option Component:

- Subsequent to the settlement of the expiring call option, a new at-the-money call option expiring in the next month is then deemed written, or sold, a transaction commonly referred to as a “roll”.
- The strike price of the new call option, which is the price the covered call option can be exercised at expiration, is the S&P 500 Index call option listed on the Cboe with the closest strike price above the last value of the S&P 500 Index reported before 11:00 a.m. New York, Eastern Time.
